Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 1 and 5, prior art fails to disclose or make obvious, in combination with other recited features of the claim limitations, a method of production of a scanning probe microscope probe provided with a sharp head made of a single wall carbon nanotube, said method comprising imparting a catalyst metal to a tip of a probe body, then irradiating the catalyzed part of the tip of the probe body by an arc discharge caused across fine needle shaped carbon electrodes in an inert gas atmosphere in the scanning probe microscope so as to cause growth of a single wall carbon nanotube at said catalyzed part.

The dependent claims 2-4, and 8-14 are allowable by virtue of their dependence upon the independent claim 1. The dependent claims 6-7 and 15-17 are allowable by virtue of their dependence upon the independent claim 5.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Houje et al. (6,727,720 B2) disclose a scanning probe made of a single-walled carbon nanotube and having the probe body which has a longitudinal axis and a shoulder, and a microstylet mechanically coupled to the shoulder.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
